ACDelco Batteries Application Guide

Issue 1, November 2010

Holden Trade Club

Introduction

ACDelco automotive batteries are among the biggest selling aftermarket batteries in Australia. And it's no surprise: these are premium quality, fully warranted units. The prices are truly competitive, and now they're available from your local Holden Trade Club Dealer.

The range of 23 batteries promoted via the Holden Trade Club program covers small-pole Japanese applications through to the largest 4x4's – in fact, most makes and models that you're likely to see in your workshop.

ACDelco batteries are a great choice for your workshop and customers, here are just a few reasons why.

Cold Cranking Amps (CCA)

Cold cranking amps is the discharge current emitted by a battery; in simple terms, it's the amount of 'grunt' provided to start the engine.

Comparing cold cranking amps can be useful when deciding which battery offers the best value for money. When you're looking at batteries from different suppliers it's important to ensure that you compare like with like.

You'll find CCA numbers for the ACDelco range in the table on the next page and printed on the battery label.

Features at a glance

1. Install date and odometer reading feature
2. Hydrometer indicates state of charge at a glance
3. Factory sealed lead calcium technology for true maintenance-free operation
4. Polypropylene case combines light weight with high impact strength
5. Heat sealed covers help prevent electrolyte contamination and increase case strength
6. Integrated carry handle

Extended battery life

ACDelco batteries feature lead/calcium expanded grids which extend battery life thanks to enhanced resistance to corrosion, overcharging, gassing, water usage, self discharge and thermal runaway.

Increased shelf life

Batteries are usually a distress purchase so having charged stock on the shelf, that's ready to be fitted, means you won't lose the sale. Compared to conventional batteries you'll enjoy longer shelf life – up to 12 months – without charging, due to the use of lead/calcium grids in ACDelco batteries.

Fit and forget

ACDelco batteries are truly maintenance-free. Factory sealed cases manufactured from strong, durable polypropylene combine light weight with high impact strength. The reinforced design supports the battery elements to give excellent resistance to road shock and vibration.

Warranty

ACDelco Sealed Maintenance Free premium batteries are built to last and are backed by the resources of GM Australia wide.

Application	Warranty period
Car (private)	30 months
SUV and 4WD	12 months
Truck/Commercial/Industrial	12 months
Taxi	6 months

Applications

You'll find comprehensive application data for Trade Club promoted ACDelco batteries listed in this guide. If the application you require is not listed please refer to the full ACDelco battery range catalogue or online at acdelco.com.au. If you don't have Internet access, here are five simple checks to help identify the correct battery.

2. Terminal layout
Do you need a left or right hand positive battery?

1. Battery case size
Check that the case size is similar – a small variation should not be a problem. Usually the most critical dimension is the case height.

3. Battery hold down
Is the battery hold down clamp height and position suitable?

4. Ensure that you will have sufficient power
Identify the battery with equivalent or next higher rating in amp/hrs. Ensure that the CCA (cold cranking amps) figures are comparable.

5. Finally
Install the battery and ensure a secure fit. Please also refer to the specification table which contains detailed information for all ACDelco batteries in the program.
