STAINLESS STEEL SECURITY SCREENS AND DOORS

Enjoy the **ultimate** freedom
for you and your family

CRIME PREVENTION PARTNERS

ULTIMATE

The

With Crimsafe Ultimate, you'll experience a whole new level of security and safety without feeling caged in. Whether you're at home relaxing with your family, out for the evening, or away on holidays, you'll enjoy the freedom of living in a home that is protected by Crimsafe Ultimate.

The ultimate protection for your home

You'll feel safe in the knowledge that Crimsafe Ultimate is:

Seven times stronger than the impact level required by the Australian Standard

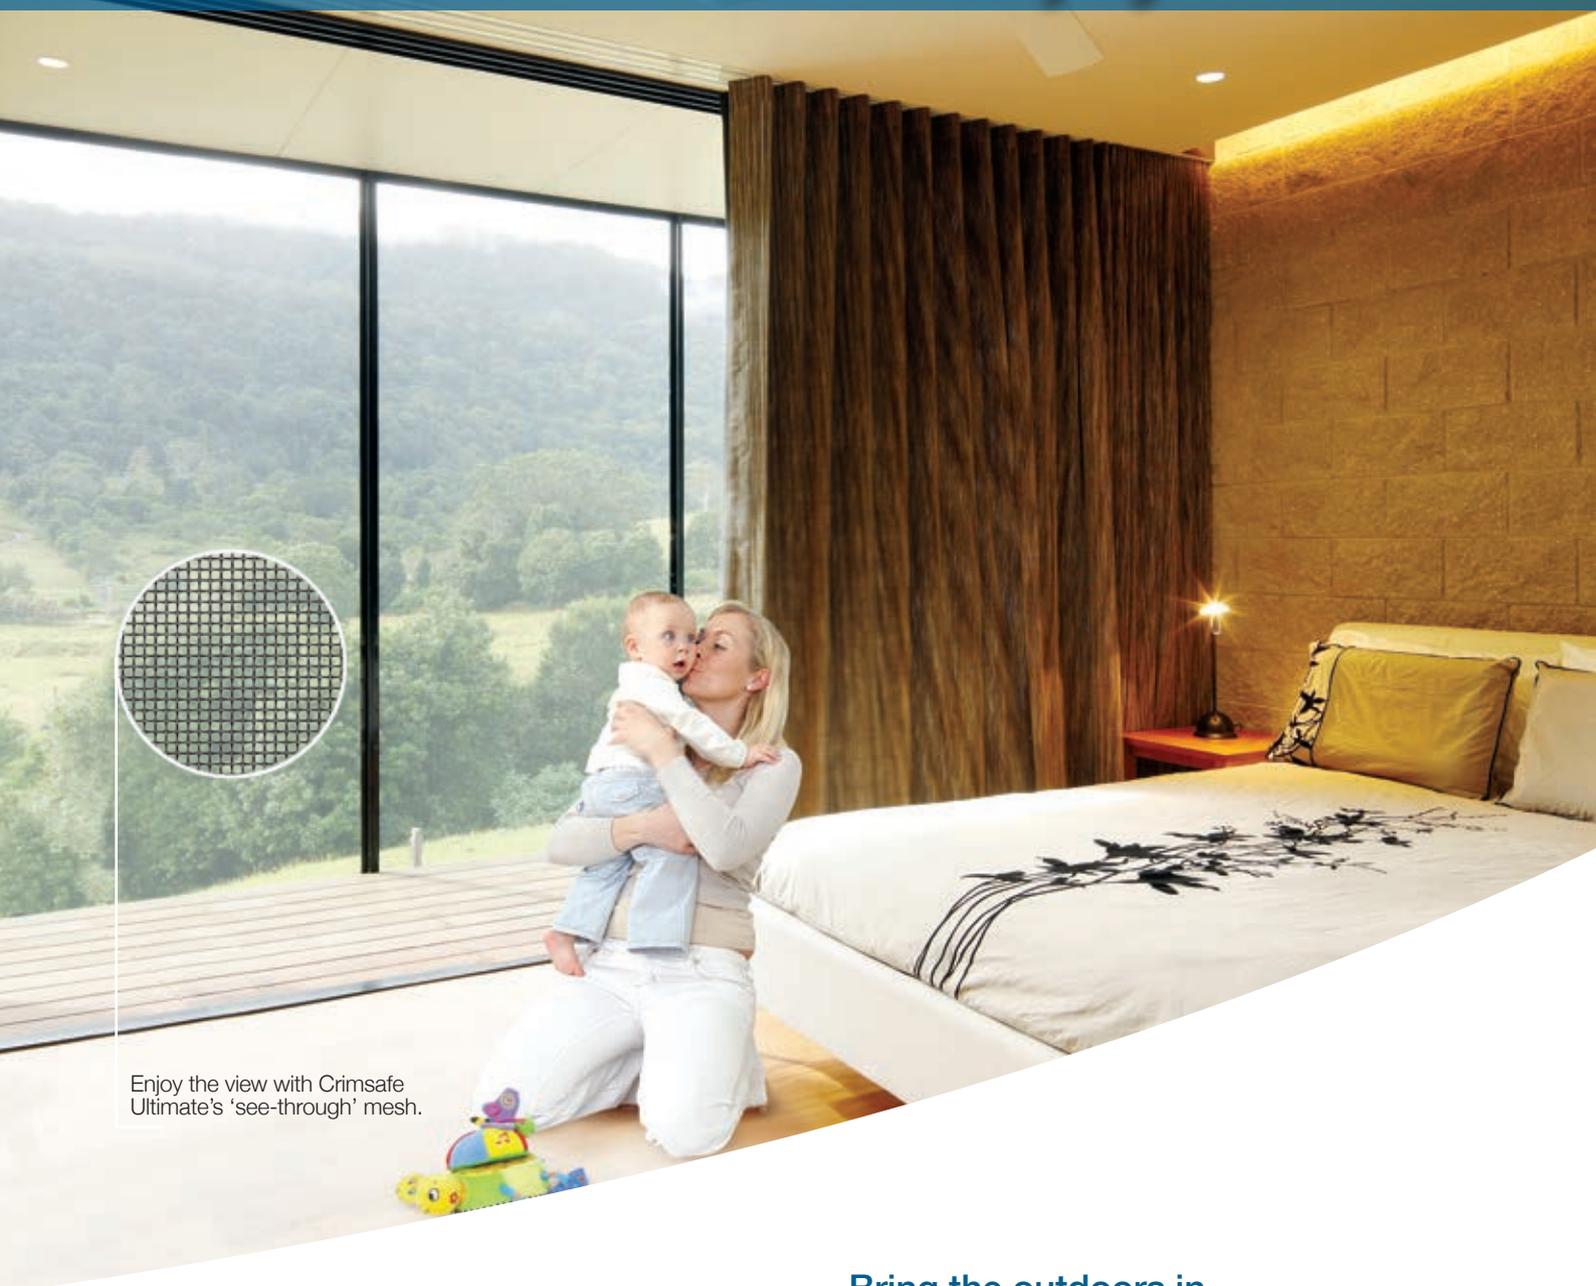

40% stronger than regular Crimsafe

Tested to withstand the equivalent of 30 years exposure to harsh environments

IF IT'S NOT CRIMS SAFE, IT'S NOT 'CRIM SAFE'!

ultimate freedom to enjoy life

Enjoy the view with Crimsafe Ultimate's 'see-through' mesh.

The ultimate look for your home

We all want our home to look its best. With Crimsafe Ultimate, you don't have to sacrifice style to feel safe and secure. Chosen by architects and specifiers for its sleek lines and designer styling, Crimsafe Ultimate is renowned for its 'see-through' mesh, allowing you to enjoy uninterrupted views from the comfort of your own home.

Made from 6063 Architectural Grade aluminium, the Crimsafe Ultimate frame features a curved profile where it meets the mesh, while a sleek, clip on cover completes the stylish look.

Bring the outdoors in with Crimsafe Ultimate

Crimsafe Ultimate is so strong it can span wider and higher openings without losing its structural integrity, making it easy to open up your home to the great outdoors. From indoor/outdoor rooms to casual servery areas, the possibilities are endless.

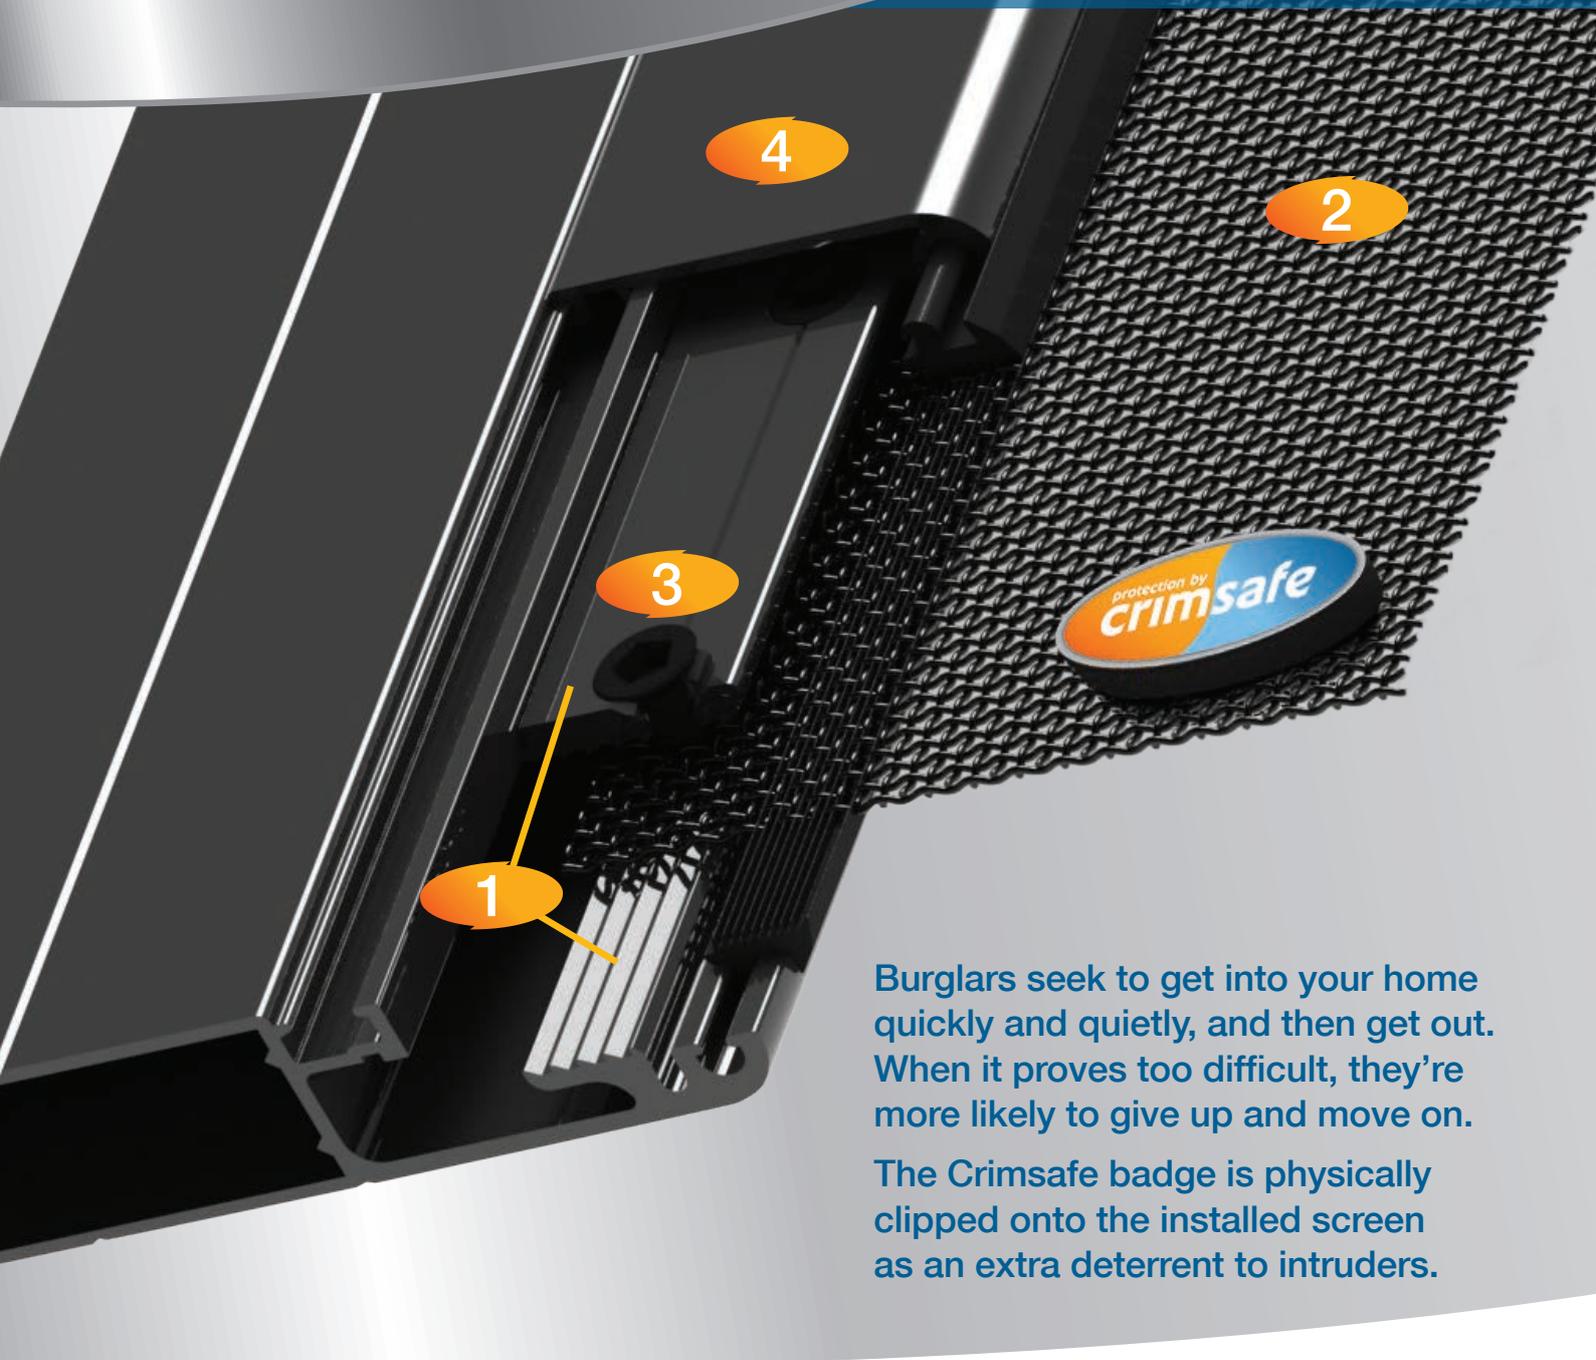

Available in a wide selection of colours to enhance your décor, Crimsafe Ultimate frames can also be custom colour-matched to create a totally seamless look.

ULTIMATE

The

Burglars seek to get into your home quickly and quietly, and then get out. When it proves too difficult, they're more likely to give up and move on. The Crimsafe badge is physically clipped onto the installed screen as an extra deterrent to intruders.

Complete security screen technology

Crimsafe Ultimate is so much more than just the mesh. It is a complete system which combines four essential elements, including:

1 Patented Screw-Clamp technology

Our patented Screw-Clamp technology has special teeth precisely matching the profile of the mesh, which locks the mesh deep into the frame. The Screw-Clamp and hook feature spread the impact throughout the frame to withstand powerful and sustained attacks. This makes it virtually impossible to separate the frame from the mesh - unlike many competitor products, where the mesh can easily pop out with force.

2 Tensile-Tuff security mesh

Crimsafe Ultimate uses 0.9mm diameter Tensile-Tuff security mesh, made exclusively for Crimsafe. The 304 Structural Grade high tensile stainless steel mesh has a 26.5% thicker cross-section than look-alike security screens, making it an all-round stronger mesh.

3 Tamper-resistant screws

Tamper-resistant fasteners are driven right through the mesh and into the frame. This binds the Screw-Clamp, the mesh and the frame together into a tightly integrated unit for greater security.

4 Clip on cover

Adding an extra layer of security, our clip on cover creates a sealed chamber, which conceals the fasteners and protects the system from the elements.

ultimate sense of security

Why look-alikes fail where Crimsafe Ultimate continues to excel

All security screens are not the same. Crimsafe Ultimate passes all relevant requirements of the Australian Standard AS 5039—2008 (Dynamic Impact test, Jemmy test, Shear test, Knife Shear test, Probe test and Pull test). In fact, independent testing has proven Crimsafe Ultimate is far superior to competing products.

To see detailed performance testing and demonstration videos, visit crimsafe.com.au

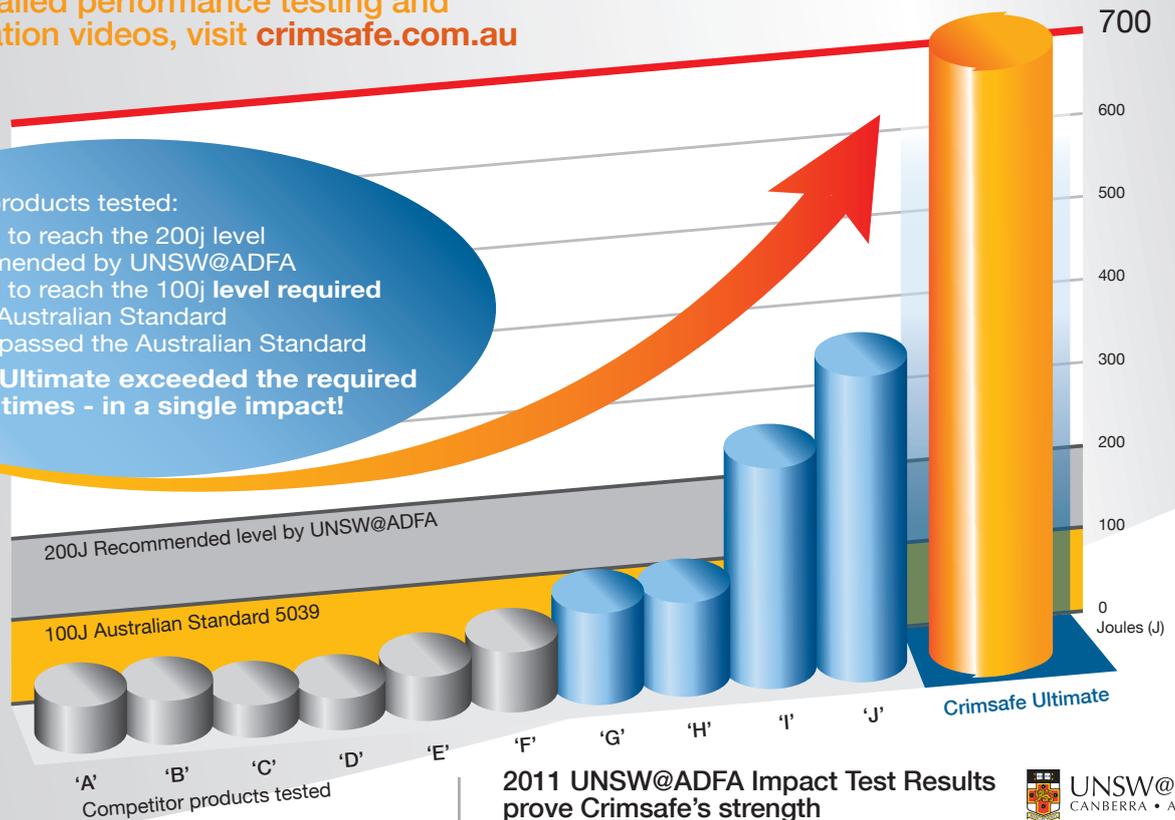

Not all impact tests are the same. The Australian Standard AS 5041—2003 Methods of Test for Security Screen Doors and Window Grilles sets the required impact level at only 100 joules.

However, the University of New South Wales at the Australian Defence Force Academy (UNSW@ADFA) recommends 200 joules as a minimum impact level, as this heavier impact more accurately represents a violent attack on a screen.

Of the 11 products tested:

- 8 failed to reach the 200j level recommended by UNSW@ADFA
- 6 failed to reach the 100j level required by the Australian Standard
- Only 2 passed the Australian Standard

Crimsafe Ultimate exceeded the required level by 7 times - in a single impact!

2011 UNSW@ADFA Impact Test Results prove Crimsafe's strength

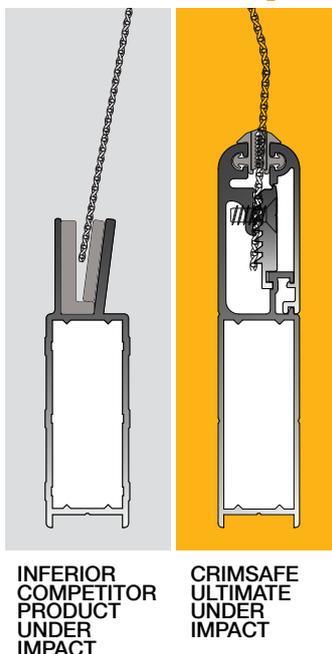

There is no comparison

While other look-alikes claim strength and durability, Crimsafe Ultimate delivers real protection from the threat of an intruder breaking into your home. So what's the difference?

- Most look-alike security screens have mesh that is held in by plastic or metal wedges. When kicked, the wedge gives way and the mesh can pop out in seconds.
- Look-alike mesh that doesn't use 0.9mm Structural Grade stainless steel is not as strong.
- Look-alike products cannot secure the mesh as deep into the frame as Crimsafe Ultimate.

The ultimate partnership - Crimsafe and Crime Stoppers

Dedicated to reducing the crime rate in Australia, Crimsafe is proud to be the only security screen company strong enough to partner with Crime Stoppers.

Crime Stoppers acknowledges Crimsafe as a manufacturer of high quality, extensively tested security doors and windows, proven to deter break-ins and intrusions.

CRIME PREVENTION PARTNERS

ULTIMATE

The

Crimsafe Ultimate has much more to offer than the ultimate safety for you and your family. With unlimited design flexibility, brilliant energy saving features and the ability to resist rust and corrosion, Crimsafe Ultimate is a smart way to add value to your home. You're investing in a trusted brand that adds instant appeal to your home and can boost its sale value.

ultimate solution for your home

The ultimate energy saver

With energy costs constantly rising, it's smart to add features to your home that reduce your energy consumption, helping you to save money. Crimsafe Ultimate can reduce your dependence on air conditioning in summer and heating in winter.

Keep your cool in summer

WERS RATED 3 STARS COOLING*

In summer, a single glazed window with Crimsafe Ultimate installed can increase the cooling efficiency from zero stars to a 3 Stars WERS rating, helping to keep your home cooler.

When applied to clear Low-emittance glass, Crimsafe Ultimate can increase the rating to an impressive 4 Stars.

Warm up in winter

WERS RATED 1.5 STARS HEATING*

In winter, Crimsafe Ultimate helps limit the escape of warmth from your home, so you stay warm and cosy inside. The heating efficiency can increase from zero stars to a 1.5 Stars WERS rating.

*In a number of aluminium window applications. The Windows Energy Rating Scheme (WERS) measures a window's heating and cooling efficiency. crimsafe.com.au/wers

The ultimate in safety

Crimsafe Ultimate Safe-S-Cape is a unique, keyless exit system that lets you exit quickly and safely in an emergency. Featuring a 'lift and flick', quick-release handle, it can be easily opened with just one finger.

Ultimate Safe-S-Cape is simple enough for a child to operate, yet cannot be opened by accident. Utilising a high strength Euro-designed locking mechanism, Crimsafe Ultimate Safe-S-Cape makes an unobtrusive safety feature for your home.

The ultimate in corrosion resistance

When you're near the ocean, the last thing you want to do is lock yourself away.

Crimsafe Ultimate gives you the freedom to enjoy sea breezes and ocean views, as well as the durability required for long-lasting performance in harsh coastal conditions.

Crimsafe Ultimate's unique anti-corrosion features also include:

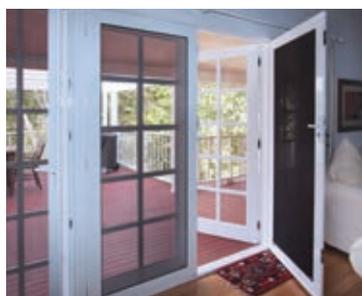

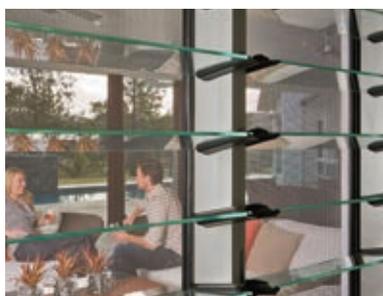

-  The Architectural Grade frame and clip on cover able to withstand 3,000 hours in the Salt Spray test—the equivalent of 30 years exposure to the elements. The industry standard is only 1,000 hours.
-  Tensile-Tuff mesh able to withstand 10,000 hours in the Salt Spray test.
-  Santoprene® insulator between the mesh and the frame which reduces water penetration and salt build-up in harsh environments.
-  High durability pre-treatment and powder coating technology.

The ultimate in design flexibility

Fly and mosquito resistant, Crimsafe Ultimate is perfect for securing large alfresco areas, bedrooms, kitchens and living areas. It is also ideal for French doors, stacking doors and serveries, allowing you to secure practically any opening in your home, including:

-  Hinged doors
-  Sliding doors
-  Sliding windows
-  Fixed windows
-  Bi-fold doors and windows
-  Awning windows
-  Casement windows
-  Louvre windows
-  Patios

Please note: We recommend a mid-rail for large openings.
